Windows

Windows and Doors that make the difference in your Project.

When building a home, office or any other building, the first thing that comes to mind is, "How much I will spend to buy the products;" and "What advantages does this particular product have over any other product?". Here at P-Tek, we are fully aware of this, and that is why our products are focused on saving energy. Our windows and doors are insulated against heat, cold and sound in addition to having weather-stripping that prevents air drafts; this will ensure comfort for you and your loved ones since the indoor atmosphere will be pleasant. In addition to the quality, our products will give your home a distinctive touch and elegance for a better view.

The windows with LoE Thermal Glass significantly block UV rays, protecting your blinds and furniture from premature fading. The windows can be manufactured to the size specifications that your construction or remodeling project requires.

The entry door is fundamental, as it is the first impression. Therefore, we offer a wide variety of top quality products, including finishes resistant to UV rays, humidity and even against termites.

Our company utilizes world-class quality materials, skilled labor and our wide commitment of service and guarantees with which we manufacture all of our products, make P-Tek without a doubt the best option when investing in a project.

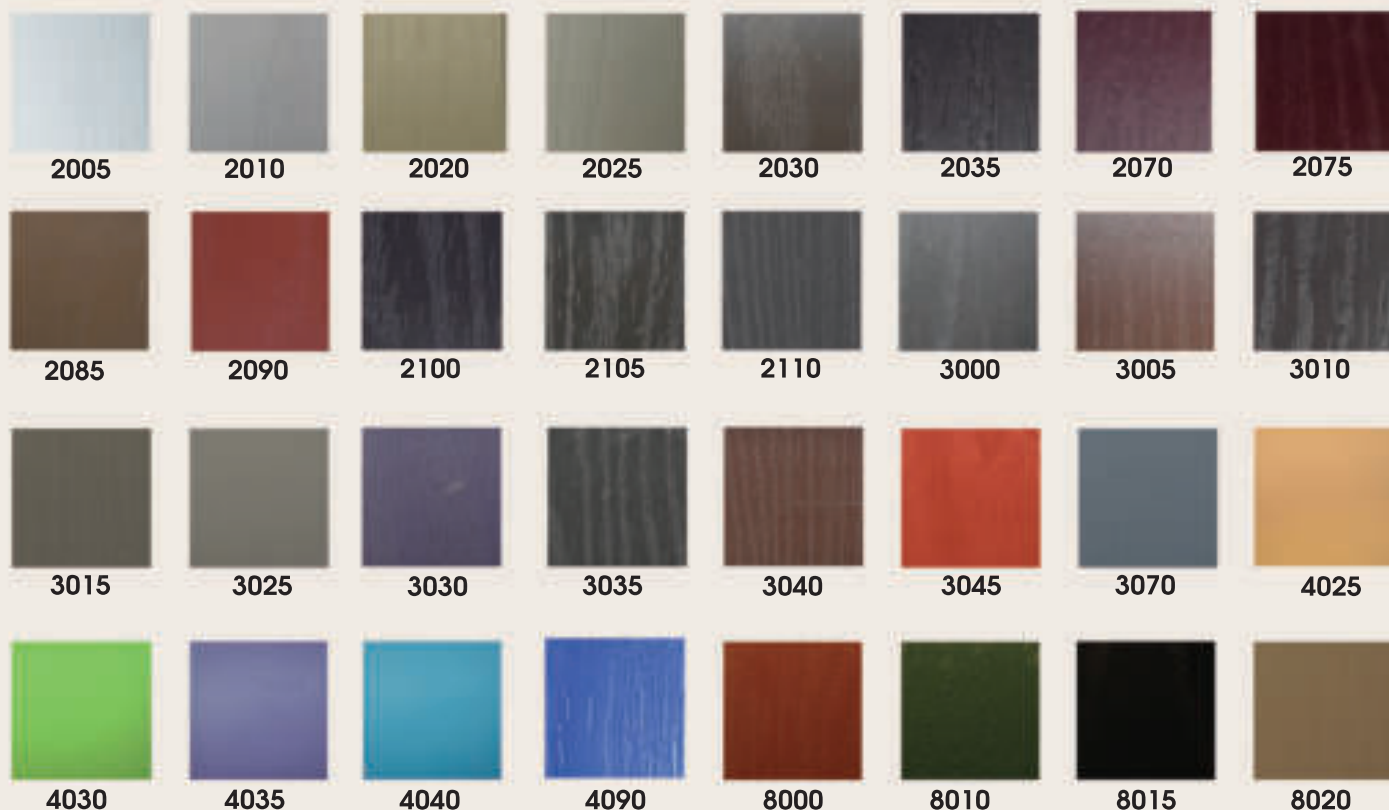

**Comfort and safety are
essential in P-Tek products...**

Door Frames

Fiberglass Frames

Door Frames

Available sizes

3-1/2" up to 21" wide*

* If a special size is required, consult with your P-Tek Dealer.

Benefits of Fiberglass (WPC) Doorframes

- Water resistant.
- Simulated woodgrain finish.
- Resistance to termites and microorganisms.
- Strong and durable.
- Long life.
- 100% recyclable.
- 100% resistant to humidity.
- Can be painted or stained.

Hinge mounting points

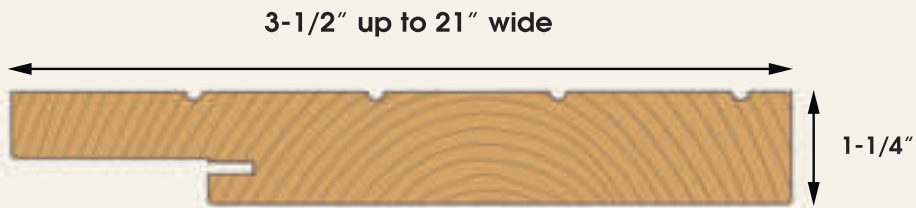

Strike plate reinforcement

Sill

Pinewood Frames & Laminated Frames

Available sizes

* If a special size is required, consult with your P-Tek Dealer.

Door Frames

Benefits of laminating your pinewood frame with aluminum sheet metal

- Increases humidity resistance.
- Strong and durable.
- Prolongs the life of the frame.
- 100% recyclable.
- Aluminum sheet is rust resistant.
- The aluminum sheet metal has a simulated wood grain texture.

Russet Red

Note: The printed colors may vary from the actual product colors.

Hinges

Door Frames

At P-Tek we use Ball bearing hinges that prevent hinge wear and door sag, especially on doors with a full view decorative glass.

On outswing doors, we offer hinges with irremovable pins for added security.

Multi-Point Astragal

Door Frames

1

Activate Flip Lever, Engage Floating Boot

Operating Flip Lever engages both Flush Bolts and patented Floating Boot. Patented spring-loaded Floating Boot finds the lowest point on the cap, independently from the bolts, and maintains a perfect seal at all times.

2

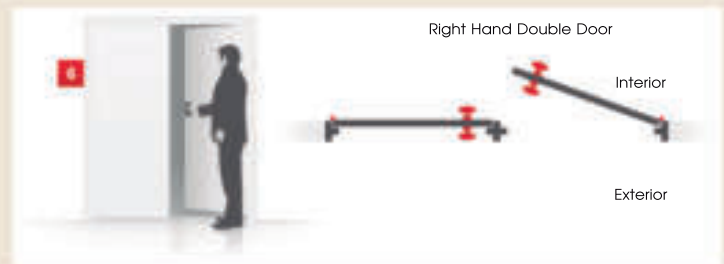

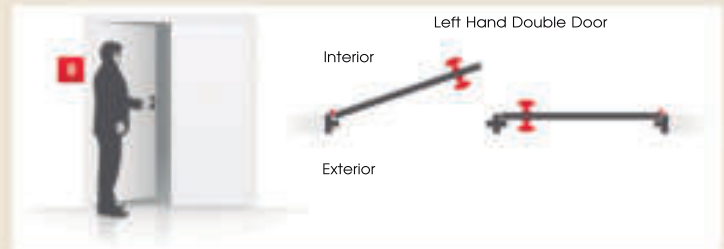

Engage Deadbolt, Activate Multi-Point Lock

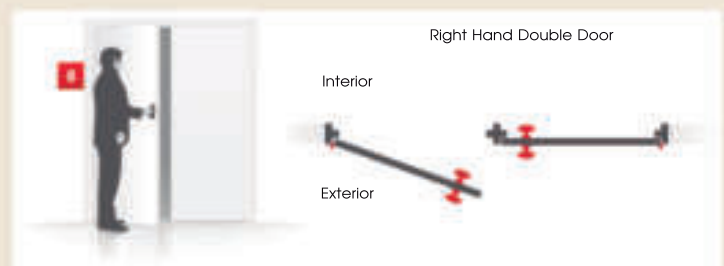

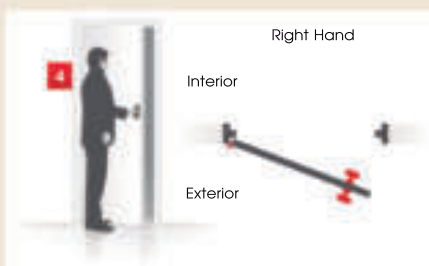

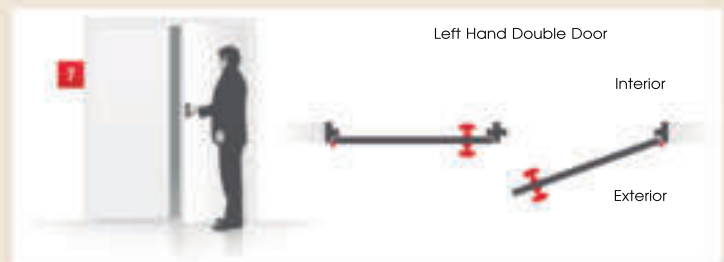

Engaging the deadbolt compresses the lock actuator to activate the patented locking system. Upper and lower multi-point lock pawls are captured by keepers in the active door panel.

Triple Weather-stripping seals against Dirt, Water and Sound

Characteristics

- Thermofused 3-1/4" profile with 14-Gauge galvanized steel reinforcement
- Robust profile that provides elegance and strength to the window
- Low maintenance, rust proof and resistant to deformation
- Offers thermal and acoustic insulation
- Versatile design that allows it to be mullioned to other windows with the same profile

Profile Options

Nailing Fin
25 Series

For installation on wood framing or metal framing. The Fin can be easily removed for installation in other solid materials such as concrete.

Flush Fin
26 Series

For installation on flat surfaces, the decorative fin eliminates the need for Brickmold.

Masonry Frame
25 Series

For installation in solid materials such as concrete or brick.

Decorative Grid Options

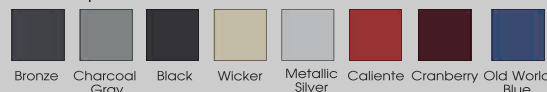

The grids between the glass (GBG) are an aesthetic feature that provides a luxurious appearance through various design patterns placed between the glass, making them an attractive and low maintenance decorative option.

Our History and Vision

P-Tek started operations in 1996 as a small company, near the city of Cuauhtémoc, in the state of Chihuahua, México. At that time, American-style building products were limited in the region, and with all dedication and enthusiasm, the first store fully dedicated to supplying Windows and Doors was opened. The demand for this type of product was such, that in the following years P-Tek became one of the most important companies in the area.

In 2009, the company was restructured with the incorporation of shareholders. This made it possible to further advance the company and spread not only locally, but also into national and international markets.

We currently manufacture PVC Windows, Fiberglass Doors, Door-Frames of WPC material and related accessories, making P-Tek a leader in manufacturing and sales.

Vision

At P-Tek we have clear growth objectives and we visualize ourselves as a Company with excellent customer service to our valued customers as well to our extensive network of National and International Distributors; at the same time it is of utmost importance to us, to keep our team motivated and well trained. In this manner, here at P-Tek we strive to continue to be leaders in our field, and that P-Tek continues to be a company of Renown and Recognition for its high quality of products and services that it offers.
